

THE BEFORE TIME

Supernova Films Presents: ***The Before Time*** – A Found Footage Film

The Before Time is written by Scott Bunt and directed by Miguel Muller. The film is produced by Peter Paul Basler and Shahrook Oomer, and is scheduled for **release - fall 2014**. The film is being produced under Basler & Muller's Supernova Films Inc. shingle.

The Before Time is a new twist on the 'found footage' horror movie genre. It features two rival television crews that head into the Sonoran desert to shoot a reality show based on a hidden Navajo treasure. Along the California and Arizona border where legend says the gold is supposed to be buried, the crews face hostility from the locals, an unfamiliar native language, and a peyote ceremony that reveals gruesome secrets of the legend that may or may not be part of their collective hallucinations! Now, as they travel farther and farther into the harsh territory in search of the gold, they discover that truth is not only stranger than fiction; it's more dangerous. Terror takes over as something wants to prevent them from digging deeper... and from escaping the desert alive!

The Before Time is currently in post-production. Supernova Films will be releasing a short trailer and official trailer prior to the scheduled release of the film in **Fall 2014**.
